- 1,280 kg or 2,816lbs per Skid
- Each Bricks expands up to 70 litres
- Super Washed Coco Peat Bales
- PH 5.5-6.0
- EC<350ppm

Why Choose our 5kg Coco Peat Brick ?

Expands to 65 Liters: Despite its compact size, our 5kg brick expands to a substantial 65 liters when hydrated, providing you with ample growing medium to support a wide range of gardening needs.

Superior Water Retention: Coco Peat can hold up to 10 times its weight in water, ensuring your plants remain hydrated for longer periods. This reduces the frequency of watering, helping you save time and conserve water

Enhances Soil Structure: Coco Peat improves soil aeration and drainage, creating the perfect environment for root growth. It prevents soil compaction, allowing roots to spread freely and access essential nutrients more efficiently

pH Balanced: With a neutral pH of 5.5 to 6.5, Coco Peat creates an optimal growing environment for a wide variety of plants, enhancing nutrient uptake and promoting overall plant health.

100% Natural and Eco-Friendly: Made from the renewable husk of coconuts, our Coco Peat is a sustainable alternative to traditional peat moss and other soil amendments. It's fully biodegradable and environmentally friendly, making it a responsible choice for eco-conscious gardeners.

Versatile Applications for Every Gardening Need

Our 5kg Coco Peat Brick is incredibly versatile and suitable for various gardening applications, whether you're working indoors, outdoors, or in a hydroponic setup:

- **Potting Mix:** Combine with other organic materials to create the perfect potting mix for your indoor and outdoor plants. Coco Peat helps retain moisture and improves aeration, promoting healthy root development.
- **Seed Starting:** Use Coco Peat as a seed-starting medium to give your seeds the best possible start. Its fine texture supports delicate seedlings and encourages strong early growth, reducing the risk of transplant shock.
- **Soil Amendment:** Improve the quality of your garden soil by mixing in Coco Peat. It enhances soil structure, increases water retention, and helps balance pH levels, creating a more favorable environment for plant growth.
- **Mulching:** Spread Coco Peat around your plants to retain moisture, suppress weeds, and protect roots from temperature fluctuations. It also adds a natural, decorative finish to your garden beds and borders.
- **Hydroponics:** Ideal for soilless growing systems, Coco Peat provides a stable, well-draining medium that promotes healthy root development and supports vigorous plant growth in hydroponic setups.
- **Composting:** Incorporate Coco Peat into your compost pile to balance moisture levels and improve aeration, speeding up the decomposition process and producing richer, more fertile compost.

Perfect for All Types of Plants

Whether you're growing vegetables, herbs, flowers, or ornamental plants, our Coco Peat Brick provides the ideal foundation for healthy, thriving plants. It's especially beneficial for:

- **Indoor Plants:** Keep your houseplants hydrated and healthy with a growing medium that ensures consistent moisture and nutrient availability.
- **Container Gardening:** Achieve optimal results in pots and planters with a substrate that supports excellent root growth and overall plant vitality.
- **Vegetable Gardens:** Enhance soil quality to produce healthier, more abundant crops in your vegetable garden.
