5.5 – 6.0	<350 PPM	8L-10L	<ol style="list-style-type: none"><li>1. <b>4.25 square feet</b> spread if 1 inch depth</li><li>2. <b>2.12 square feet</b> spread if 2 inch depth</li><li>3. <b>1.41 square feet</b> spread if 3 inches depth</li></ol>

# 650g Coco Brick Skid

- 20 Bricks fit into one carton
- 100 Cartons per Skid
- 2000 Bricks per Skid
- Perfect for Ecommerce & Retail

# Why Choose 650g Coco Peat Bricks ?

**Expands to 8-10 Liters:** Despite their compact size, our 650g Coco Peat Bricks expand to an impressive 8-10 liters of premium growing medium when hydrated. Just add water, and watch as the brick transforms into a light, fluffy substrate that's perfect for all your gardening needs.

**Exceptional Water Retention:** Coco Peat is renowned for its ability to retain moisture, ensuring that your plants stay hydrated longer. This reduces the need for frequent watering and helps maintain consistent moisture levels, even during dry spells.

**Improves Soil Structure:** Our Coco Peat Bricks enhance soil aeration and drainage, creating an optimal environment for root growth. The improved soil structure allows roots to access nutrients more easily, leading to healthier, more vigorous plants.

**pH Balanced and Nutrient-Rich:** With a neutral pH of 5.5 to 6.5, Coco Peat provides an ideal growing environment for a wide variety of plants. It's also rich in essential nutrients, helping your plants thrive without the need for chemical additives.

**Sustainable and Eco-Friendly:** Made from the fibrous husk of coconuts, Coco Peat is a renewable, biodegradable resource. By choosing our Coco Peat Bricks, you're making a positive impact on the environment by reducing your carbon footprint.

# Versatile Applications for Every Gardener

Our 650g Coco Peat Bricks are incredibly versatile and can be used in a variety of gardening applications, making them a must-have for any gardener:

## Perfect for All Your Gardening Needs

- **Seed Starting:** Coco Peat provides a soft, fine-textured medium that is perfect for germinating seeds. It supports delicate seedlings, ensuring strong early growth and reducing the risk of transplant shock
- **Potting Mix:** Blend with soil or other growing media to create the perfect potting mix for indoor and outdoor plants. Coco Peat improves moisture retention and aeration, promoting healthy root development
- **Soil Amendment:** Use Coco Peat to improve the texture and structure of garden soil. It helps to aerate heavy soils, retain moisture in sandy soils, and balance pH levels, creating a more favorable environment for plant growth
- **Hydroponics:** Ideal for soilless growing systems, Coco Peat provides a stable, well-draining medium that promotes healthy root development and supports vigorous plant growth in hydroponic setups
- **Mulching:** Spread Coco Peat around your plants to help retain soil moisture, suppress weeds, and protect the soil from temperature extremes. It also adds a natural, attractive finish to your garden beds and containers.
- **Composting:** Mix Coco Peat into your compost pile to enhance moisture levels and improve aeration, accelerating the composting process and producing richer, more fertile compost

Whether you're growing herbs, vegetables, flowers, or ornamental plants, our 650g Coco Peat Bricks are the ideal choice for supporting strong, healthy growth. They're especially beneficial for:

- **Indoor Plants:** Keep your houseplants thriving with a growing medium that ensures consistent moisture and nutrient availability.
- **Container Gardening:** Achieve optimal results in pots and planters with a substrate that promotes excellent root growth and plant health.
- **Vegetable Gardens:** Improve the quality of your soil to produce healthier, more abundant crops.
